6th Annual
Anogenital and Oral Dermatology Conference

Dermatology course for healthcare professionals

This one day annual course is aimed at all healthcare professionals (dermatology, gynaecology, GU medicine and oral medicine, GPs) who wish to learn more about the diagnosis and management of diseases for anogenital and oral dermatology. It will address the importance of multi-disciplinary working in the care of these patients.

28 - 29 April 2016

Course details

6th Annual Anogenital and Oral Dermatology Course 2016

Dates
28 – 29 April 2016

Venue
The Royal College of Physicians
11 St Andrew's Place
Regent's Park
London, NW1 4LE

The Royal College of Physicians is situated in Regents Park, in the centre of London and is easily accessible by train and tube.

Who should attend?
This two day annual conference is aimed at all health care professionals (dermatology, gynaecology, GU medicine, oral medicine, GPs, and specialist nurses) who wish to learn more about the diagnosis and management of male and female anogenital and oral dermatological disorders. It will address the importance of multi-disciplinary working in the care of these patients. Delegates are welcome to attend one or both days.

Overall aims and objectives
This conference provides participants with a practical overview of anogenital and oral dermatology, including diagnosis, treatment options and dealing with complications and co morbidities. Throughout the programme clinical based studies will be used to highlight current treatments and to combine theory and clinical practice.

Format
The conference combines presentations, case studies, examples of best practice and Q and A sessions. Accreditation for twelve CPD points by the Royal College of Physicians has been applied for.

Course materials
Delegates will receive comprehensive materials to take away.

Conference directors

Dr Fiona Lewis
Consultant Dermatologist, St John's Institute of Dermatology, Guy's and St Thomas' and Heatherwood and Wexham Park Hospital.
Dr Lewis has developed a special interest in Vulval disease and completed her MD thesis on Lichen sclerosus. She now leads the Vulval clinics at St John's Institute of Dermatology.
She has published widely on many aspects of the subject and co-authors the textbook Ridley's 'The Vulva'. She teaches regularly both locally and internationally and is Secretary of the European College for the Study of Vulval Disease.

Dr Jane Setterfield
Reader/Honorary Consultant, Department of Oral Sciences and St John's Institute of Dermatology, Guy's and St Thomas' NHS Foundation Trust.
Dr Setterfield leads the Oral Dermatology Service at St John's Institute. Dr Setterfield has developed a special interest in oral and mucocutaneous diseases. She has published widely on many aspects of mucocutaneous including mucous membrane pemphigoid, pemphigus and lichen planus. She teaches regularly both locally and internationally and is a member of the European and British Societies for Oral Medicine.

Professor Chris Bunker
Consultant Dermatologist, University College London Hospitals
Professor Bunker studied medicine at Cambridge University and Westminster Medical School, and completed his general training in NHS hospitals in Derby, London and Oxford. He went on to specialise in dermatology at the Middlesex Hospital and at University College London Hospitals (UCLH) NHS Foundation Trust. He was appointed Consultant Dermatologist at UCLH in 2010. Previous to this, he had been a Consultant Physician in Dermatology at the Chelsea and Westminster, Charing Cross and Royal Marsden hospitals for almost 20 years. He is the Immediate Past President of the British Association of Dermatologists. His clinical and research interests include melanoma, male genital dermatoses and HIV dermatology.

Conference faculty
Our conference faculty comprises experts in the field of dermatology and oral medicine, from the UK and Europe.

Guy’s and St Thomas’ NHS Foundation Trust

Guy’s and St Thomas’ NHS Foundation Trust (GSTT) is one of the largest Foundation Trusts’ in the UK. It consists of St Thomas’ Hospital, Evelina London Children’s Hospital and Guy’s Hospital.

The Trust provides a full range of hospital services, as well as specialist services including cancer, cardiothoracic, women and children’s services, kidney care and orthopaedics. Guy’s is a major centre for cancer and renal services with the UK’s largest kidney donor programme, and is also a leading centre for genetics, stem cell and allergy research. St Thomas’ is a leading centre for the treatment of cardiovascular disease, stroke, HIV and dermatology.

The Trust has one of the largest critical care units in the UK and one of the busiest A&E departments in London.

GSTFT has an annual turnover of £1.2 billion and employs 13,500 staff. Last year the Trust handled over 2 million patient contacts including:

- 1.07 million outpatients
- 85,000 inpatients
- 88,000 day case patients
- 192,000 accident and emergency attendances
- 859,000 in community services
- 6,847 babies delivered

The Trust has 665 beds at St. Thomas’, 288 at Guy’s and 144 at the Evelina London Children’s hospital and 64 in the community.

NHS statistics show that our patient survival rates are nearly 25 per cent better than the national average. This is one of the lowest standardised mortality rates in the NHS and provides an important indication of the quality of care provided by our clinical staff.

St John’s Institute

St. John's Institute of Dermatology is the largest clinical dermatology unit in the UK and remains one of the world’s leading centres for patients with skin diseases. It has five highly specialised laboratory services dedicated to the diagnosis and management of skin disease within St John’s:

- Immunodermatology Laboratory
- Dermatopathology Laboratory
- Epidermolysis Bullosa Laboratory
- Skin Tumour Unit
- Mycology Diagnostic Service
