

Visiting Professional Programme: Paediatric ICU

Introduction

The Guy's and St Thomas' NHS Foundation Trust Paediatric ICU Visiting Professional Programme (VPP) is designed to provide international visiting professionals with the opportunity to experience our paediatric ICU unit first hand. The programme is a unique chance to be fully integrated within the quaternary PICU based on Forest Ward at Evelina London, one of the largest providers of children's services in London and at the forefront of clinical activity, training and research.

This unique Paediatric ICU Visiting Professional Programme enables visiting professionals to work within the lead centre PICU for the South Thames Critical Care network and one of the biggest mixed (general and cardiology) paediatric ICUs in the UK. Evelina London PICU is one of the few UK mixed general and cardiac PICU's with an integrated retrieval service, providing emergency transport for critically ill children from the South East of England. Evelina PICU is also one of the first units in the UK to provide an in-house bronchoscopy and airway stenting service delivered from within the PICU consultant team. Teaching and training is a major focus in the PICU and a national course for training paediatric critical care advanced nurse practitioners is delivered from within the PICU consultant body. The paediatric research lead for Evelina is a consultant in the paediatric ICU, making this programme ideal for those wishing to witness the mechanics of research as part of their programme. Visiting professionals will also be working within one of the most innovative paediatric units in the country with the national diabetic guidelines driven from the PICU, first unit in the UK to train and use paediatric critical care advanced nurse practitioners on retrieval, first paediatric emergency drug calculator in the UK pioneered by the Evelina unit and the involvement of parents during the transfer process and subsequent care of their children in PICU.

The programme has been designed by our clinical leads to provide a unique development experience which enables visiting professionals to broaden their clinical expertise in the PICU and on retrieval and learn new skills that can be transferred back to their workplace. We are excited to deliver exclusive access to observe and work alongside our Evelina Hospital PICU team based on Forest Ward, and to provide an opportunity for international professionals to gain insight into our Trust and the role that clinicians within paediatric ICUs play within the NHS.

Who should apply?

This programme is intended for non-U.K. paediatricians, trainee paediatricians, anaesthetists (for clinical rotations), nurses, intensive care nurses or advanced nurse practitioners. All job levels are considered from consultants to senior trainees, as well as senior nurses wanting to explore critical care advanced nurse practice.

Visitors have the choice of applying for a hands-on attachment or observership programme. Those wishing to apply for a hands-on attachment must have GMC registration and NMC registration. You can apply for GMC registration directly through the main GMC website (www.gmc-uk.org), alternatively The Royal College of Physicians run a medical training initiative which facilitates GMC registration and provides sponsorship for a Tier 5 visa. You can find out more about their Medical Training Initiative by visiting their website (www.rcplondon.ac.uk/education-practice/advice/medical-training-initiative). NMC registration can be applied for via www.nmc.org.uk

Duration

It is recommended that in order to get the most out of the Paediatric ICU programme, that visiting professionals undertake a hands-on attachment placement of at least 6 months. However, the programme's duration can potentially be tailored to the specific learning requirements of those visiting the Trust.

Format

The paediatric ICU programme is delivered within the hospital workplace and it has been designed by our clinical leads to educate visitors in a range of complex and emergency cases through exposure to acute resuscitation and stabilisation on retrieval, ward rounds and internal education activities such as research meetings. A typical weekly schedule includes ward rounds, cardiac, radiology and multi-disciplinary meetings, plus several hours of education and training.

Visiting professionals will also be able to get involved with the paediatric ICU's outreach teaching programme to the South Thames Critical Care Network of 25 district general hospitals. Here high fidelity simulated paediatric emergencies are used in the teaching and training of local teams to improve expertise during paediatric resuscitation and stabilisation for transfer. Visiting professionals will be welcomed to take part as observers or assistants during these outreach sessions.

The programme allows visitors to be fully integrated within the day to day service of our teams. We will also align visitors with supervisors from within the clinical team who will provide one to one support and ensure that all of the learning and development needs and expectations are met.

Overall Aims

The programme is aimed at those who wish to extend their expertise in paediatric ICU in the UK.

The programme aims to include:

- Direct experience and exposure of ward rounds and sub-specialty activities including cardiology, retrieval, radiology and bronchoscopy
- Recognition, stabilisation and resuscitation of all common paediatric emergencies
- Management of ICU procedures including paediatric intubation and vascular access
- Involvement with our leading research programme and clinical research meetings
- Opportunities to attend and contribute in our multidisciplinary meetings
- Regular clinical educational meetings
- The chance to undertake hands on clinical practice. Please note that this is dependent on programme duration and previous experience (not for observers)

Sample weekly timetable

Monday	Tuesday	Wednesday	Thursday	Friday
1 hour sit down ward round teaching				
1 hour lunchtime ward round with duty consultant	Radiology clinic	1 hour lunchtime ward round with duty consultant	1 hour lunchtime ward round with duty consultant	30 mins cardiac teaching
	1 hour lunchtime ward round with duty consultant			1 hour lunchtime ward round with duty consultant
1.5 hour evening ward round with duty consultant		3 hour cardiology multi-disciplinary meeting	1.5 hour evening ward round with duty consultant	1 hour afternoon ward round with duty consultant
	Infectious diseases Multi-disciplinary meeting	1.5 hour evening ward round with duty consultant		1.5 hour evening ward round with duty consultant
	1.5 hour evening ward round with duty consultant			

Plus, once a month fellows are expected to attend a study day on the paediatric intensive care medicine curriculum (provided they are not required on ward rounds). Seven times a year fellows also take part in team retrieval training days, with regional study days taking place three times per year.

Paediatric ICU Service

Evelina Hospital's Forest Ward hosts the Paediatric Intensive Care Unit. It's a 20 bed unit and provides intensive care for critically ill children from south east England and beyond.

Evelina's PICU is the lead centre for critically ill children for the south Thames region and provides a wide range of services and clinical expertise. It's also a busy cardiac unit, providing all types of cardiovascular surgery (excluding cardiac transplant).

The South Thames Retrieval Service – a paediatric intensive care retrieval service which transfers critically ill children from across the south east to intensive care units in London, is based in the Evelina PICU and staffed from within the main PICU staffing pool.

Research

The PICU team constantly participates in research to improve patient care. We are currently studying coagulation following paediatric cardiovascular surgery, as well as being involved in multiple sub specialty projects where children have become acutely unwell.

Evelina London Children's Hospital

At Evelina London we provide a comprehensive range of children's healthcare services, so that we are able to look after patients from antenatal diagnosis through childhood, into adolescence and on into adult life.

Evelina co-ordinates complex care for children across the South Thames region, working in partnership with King's College hospital, the Royal Marsden Hospital and St George's Hospital.

We are the second largest provider of children's services in London.

Children's services provided in Evelina London and St Thomas' Hospital treat around 55,000 children a year.

We have 130 inpatient and day beds, 20 paediatric intensive care beds, 46 neonatal cots, six operating theatres and a busy kidney dialysis unit.

Faculty

The intensive care (PICU) team at Evelina is multidisciplinary with many different clinicians who have a varied wealth of experience and expertise in caring for critically ill children.

The team is led by a matron and intensivists, who are supported by highly skilled nursing and medical staff, as well as technicians, pharmacists, therapists, counsellors, dieticians, play specialists, chaplains, clerical and housekeeping staff.

Consultants

- Prof Ian Murdoch – head of department and clinical lead for PICU
- Dr Sara Hanna – intensive care consultant and medical director of children's services
- Dr Helen Daly – consultant clinical director intensive care and surgical specialities & anaesthetist
- Dr Andrew Durward – intensive care consultant & clinical lead for Airway service
- Dr Shane Tibby – intensive care consultant & Evelina research lead
- Dr Shelley Riphagen – intensive care consultant & STRS clinical medical lead
- Dr Marilyn McDougall – intensive care consultant & Education lead
- Dr Paul James – intensive care consultant & anaesthetic lead
- Dr Andrew Nyman – intensive care consultant & IT lead
- Dr Alison Pienaar – intensive care consultant & clinical governance lead
- Dr Joanne Perkins – intensive care consultant, sub-specialties liaison & anaesthetist
- Dr Jonathan Lillie – intensive care consultant & NICU liaison
- Dr Claire Barker – intensive care consultant, anaesthetists and A&E liaison

Other key staff

- Louise Dewsbury – intensive care matron
- Fiona Lynch – nurse consultant
- Annette Toner – assistant to Prof Murdoch and department secretary
- Fiona Bickell – South Thames Retrieval Service joint nursing lead/ coordinator
- Karen Starkie – South Thames retrieval Service joint nursing lead/ co-ordinator

Fees

A course fee per week will be applied. This excludes accommodation and travelling expenses. Participants will be provided with a certificate at the end of their attachment.

Registration and enquiries

Guy's and St Thomas' NHS Foundation Trust

Guy's and St Thomas' NHS Foundation Trust is one of the largest Foundation Trusts in the UK. It consists of St Thomas' Hospital, Evelina London Children's Hospital and Guy's Hospital.

The Trust provides a full range of hospital services, as well as specialist services including cancer, cardiothoracic, women and children's services, kidney care and orthopaedics. Guy's is a major centre for cancer and renal services with the UK's largest kidney donor programme, and is also a leading centre for genetics, stem cell and allergy research and cleft lip and palate. St Thomas' is a leading centre for the treatment of cardiovascular disease, stroke, HIV and dermatology.

The Trust has one of the largest critical care units in the UK and one of the busiest A&E departments in London.

It has an annual turnover of £1.2 billion and employs 13,500 staff.

Last year, the Trust handled over 2 million patient contacts, including:

- 1.07m outpatients
- 85,000 inpatients
- 88,000 day case patients
- 192,000 accident and emergency attendances
- 859,000 in community services
- 6,847 babies delivered

The Trust has 665 beds at St Thomas', 288 at Guy's, 144 at the Evelina London Children's Hospital and 64 in the community.

NHS statistics show that our patient survival rates are nearly 25 per cent better than the national average. This is one of the lowest standardised mortality rates in the NHS and provides an important indication of the quality of care provided by our clinical staff.

In 2013, the Dr Foster Hospital Guide awarded us Trust of the Year for safe care.

Care Quality Commission (CQC) rating

Guy's and St Thomas' achieved a 'Good' overall rating by the Care Quality Commission (CQC) with several services rated 'Outstanding'.

CQC inspectors visited the Trust's hospital and community services from 7-10 September 2015 with further unannounced visits taking place later the same month.

In its report, the CQC praises staff who its inspectors found to be 'highly committed to the Trust and delivering high quality patient care'.

Guy's and St Thomas' NHS Foundation Trust values

Our values help us to define and develop our culture – what we do and how we do it.

Making people aware of the Trust values, making them part of our culture and demonstrating them through the organisation helps us develop a shared way of acting.

Our values are a key part of everything that we do as an organisation, from being included in staff job descriptions and in our publications, through to our work on leadership development and performance management. Our five values are listed below:

1. Put patients first
2. Take pride in what we do
3. Respect others
4. Strive to be the best
5. Act with Integrity

Every day we aim to provide the most exceptional care to our patients from dedicated staff who follow our five values. Take a look at our video at <http://gti/services/organisational-devt/values-behaviours/our-values.aspx> to see what our values mean to them.

Evelina London

Evelina London provides comprehensive health services from before birth, throughout childhood and into adult life.

Our community services care for children and families in Lambeth and Southwark. Our children's hospital not only cares for local families but also provides an extensive range of specialist services for children with rare and complex conditions from across south London, Kent, Surrey and Sussex.

Located on the St Thomas' hospital site, our award winning children's hospital building opened in 2005 and brought together Guy's and St Thomas' children's services. We have a long heritage in children's healthcare, the original Evelina Hospital for Sick Children opened in 1869.

Our Mission is to improve the lives of children and young people by:

- Providing consistently outstanding, life-enhancing healthcare.
- Educating and training people to deliver effective child-centred care and treatment.
- Undertaking research that adds to knowledge about how to improve child health and changes practice.

Evelina London is the second largest provider of children's services in London. We have 167 inpatient beds, 20 paediatric intensive care beds, 52 neonatal cots, six operating theatres and a kidney dialysis unit. We also have both cardiac and labour wards alongside the ICU units, which is rare.

Evelina London Children's Hospital was the first children's hospital in England to be rated as 'Outstanding' by the CQC. Community services were rated 'Good' putting them in the top 33% of children's community services nationally.
